Week -3
Aim : To create a webpage with HTML5 and uses inline CSS
Code :

```
<!DOCTYPE html>
<html>

<head>
<link rel="icon" href="images/HMS-Logo.jpg" type="image/jpg" sizes="16x16">
<title>HMS</title>

<style>
header {
    background-color:green;
    color:white;
    text-align:center;
    padding:5px;
}

footer {
    background-color:black;
    color:white;
    clear:both;
    text-align:center;
    padding:5px;
}

nav a {
height:40px;
width:80px;
border-color: ButtonHighlight ButtonShadow ButtonShadow ButtonHighlight;
display: inline-block; padding: 2px 8px;
border-style: solid; border-width: 1px;
background: ButtonFace; color: ButtonText;
background-color:tan;
}

nav a:link, a:visited {
    text-decoration: none;
    cursor: auto;
}

nav a:link:active, a:visited:active {
}
```

```
</style>
</head>

<body>

<header>
<aside>
<table align="center">
<tr>
<td><h1>Welcome to Hospital Management System</h1></td>
</tr>
</table>
</header>

<table width="100%" height="435px" border="1">
<tr>
<td width="10%" valign="top" bgcolor="wheat">
<nav id="menu">
<a href="menu/home.php" target="hmsFrame">Home</a>
<a href="menu/what-HMS.php" target="hmsFrame">What is HMS?</a>
<a href="menu/mission.php" target="hmsFrame">Our Mission</a>
<a href="menu/services.php" target="hmsFrame">Services</a>

</nav>
</td>
<td bgcolor="snow">
<iframe name="hmsFrame" id="hmsFrame" width="100%" height="550px"
frameborder="5" src="images/hospital.jpg"></iframe>
</td>
</tr>
</table>
</aside>
<table width="100%" border="1">
<tr>
<td bgcolor="peru" align="center">News Update: </td>
<td bgcolor="oldlace" color="yellow" width="800px"><marquee>New Facilities of
Cardiology added ||   Entrance examination results to be announced || CGHS cards
accepted || In-house insurance</marquee></td>
</tr>
</table>
</body>
</html>

Mission.php

<!DOCTYPE html>
<html>
```

```
<body>
<big>
<b>How do we enhance your hospital experience?</b><br />
We envision to streamline access to Hospital resources
and provide hassle free services to customers and administration alike in following
areas:
<ul>
<li>Provide Emergency Contact Details</li>
<li>Provide Service for Ambulance contact</li>
<li>Provide a deep understanding to some of the common diseases</li>
<li>Provide understanding to diseases based upon study of Human Body </li>
<li>Provide online consultancy service to users through submission of their
symptoms</li>
<li>Provide online appointment service to users</li>
<li>Provide users with an account in which they can go through their previous
records</li>
<li>Provide latest additions to the hospital through News bulletin</li>
</ul> <br />

<u>You can navigate to the services section in order to get most out of it!</u>
</big>
</body>
</html>
```

Output:

Welcome to Hospital Management System

Home
